29th January 2013

Dear Parents / Caregivers,

Students of Mathematics B are currently commencing Semester 1. Mathematics B requires the significant use of graphics calculators throughout the year. Students may borrow graphics calculators from the College to take home provided we have your assurance that calculators that are damaged, broken or lost will be replaced immediately by the responsible parent/caregiver. Texas Instruments TI-84 Plus graphics calculators may be purchased for about $200. If you wish your student to be able to use this facility please sign and return the permission form below. Students who are not given permission to take a graphics calculator home may borrow one from the school for use during school hours in a classroom or the Resource Centre only.

If you have any questions or wish to discuss this then please phone Reuben Smith on (07) 5547 9333.

Yours sincerely,

[Signatures]

Jude Fox
Principal

Reuben Smith
Acting Head of Department - Mathematics

Yes, I would like ________________________________ (enter name)

to have the loan of a graphics calculator. I understand that I must replace the calculator as soon as possible if it is damaged or lost.
